

## AEROSOL SHAVING GEL IN B.O.V. SYSTEM

IGEPAK S.A., a contract filler and company with a wide expertise in the development and production of aerosol products, has developed an improved aerosol shaving gel formula in B.O.V. system that allows the product not to be in contact with the propellant gas, thus keeping the product's integrity and fully maintaining its properties.

### ANTI-IRRITATING FORMULA

The Shaving Gel ensures a close and comfortable shave even with the most sensitive skins. **Its protective film minimizes friction and improves razor glide during shaving.**

### SOOTHES AND REGENERATES THE SKIN

It contains **allantoin**, which acts as an anti-irritant, and **aloe vera**, which soothes and regenerates the skin after shaving.

The Shaving Gel protects against micro cuts and shave irritations.

As a result, the skin looks healthy and feels comfortable and smooth.

### HOW TO USE THE SHAVING GEL

Release gel onto fingertips. Massage directly on wet face to form a reach, creamy lather. Shave and then rinse.

IGEPAK S.A. offers turnkey tailor-made solutions from developing, producing and filling aerosols to delivering anywhere in the world. It also provides support regarding existing regulations The Company's facilities include: White room, water treatment plant (osmosis and CDI), seven fully automatic filling lines. Three of these lines are prepared for filling with the B.O.V. system.
