

SPRAY DRY SHAMPOO

IGEPAK S.A., a contract filler and company with a wide expertise in the development and production of aerosol products, has developed a DRY SHAMPOO in spray that instantly absorbs oil to refresh hair gently, leaving it clean, light and with volume without washing, as often as required. Different perfumes, alcohol-soluble active ingredients and polymers can be added for a perfect result.

THIS INNOVATIVE DRY SHAMPOO TRANSFORMS LIFELESS HAIR TO BOUNCY HAIR

This dry shampoo allows cleaning the hair without getting it wet. Quick and practical to use, it is particularly recommended for busy people or for the bed-ridden, who cannot wash their hair. The combination of highly absorbent agents (micronized powders with very powerful oil absorbing properties) soaks up dirt or sebum on the scalp. The hair regains volume, freshness and lightness within minutes. It's perfect for hair that tends to get greasy quickly.

HOW TO USE THE DRY SHAMPOO

1. Shake well before use. Spray uniformly onto oily roots at a distance of 8 inches.
2. Massage into the scalp. Leave for 2 minutes.
3. Then brush thoroughly to remove all traces of powder residue. Aerate your hair using a hair-dryer and then style as normal.

This dry shampoo can be used as frequently as necessary. Avoid inhalation and contact with the eyes.

IGEPAK S.A. offers turnkey tailor-made solutions from developing, producing and filling aerosols to delivering anywhere in the world. It also provides support regarding existing regulations. The Company's facilities include: White room, water treatment plant (osmosis and CDI), seven fully automatic filling lines. Three of these lines are prepared for filling with the B.O.V. system.
