

100% PURE & ECOCERT ORGANIC ARGAN OIL IN AEROSOL FORMAT

IGEPAK S.A., a contract filler and company with a wide expertise in the development and production of aerosol products, has developed a new 100% Pure & Ecocert Organic Argan Oil, cold-pressed & deodorized, in aerosol format.

A VERSATILE BEAUTY PRODUCT

Our organic Argan Oil is a 100% Argania Spinosa (Argan Tree) Kernel Oil. It's naturally derived, ethically sourced and fair trade. Certified by Ecocert Greenlife, according to the standards for natural and organic cosmetics. Rich with vitamin E, anti-oxidants, and essential fatty acids, it contains everything that your skin and hair needs to function optimally and effectively fight the damaging effects of free radicals and aging. It is a versatile beauty aid that hydrates, nourishes and protects your face, skin, hair and nails, so that you look younger, healthier, and naturally more beautiful. It's incredibly easy to apply without any waste, thanks to its spray format, and absorbs instantly into your skin and hair without leaving greasy or oily residue when appropriate amounts are used. Perfectly safe for all skin and hair types.

THE BENEFITS OF ARGAN OIL

- Strong anti-aging properties. Helps to visibly reduce crow's feet and wrinkles
- Powerful moisturizer that leaves your skin smoother, more radiant, and noticeably younger. Soothes chapped lips and cracked heels. Hydrates and softens dry, brittle nails
- Protects skin and hair against environmental factors and free radicals
- Improves skin firmness and boosts radiance and tone
- Makes hair softer, silkier and more manageable. Stimulates hair growth

HOW TO USE ARGAN OIL FOR BODY

- Shake and spray evenly at a distance of approx. 25 cm. on damp skin after showering and massage gently.
- Shake and spray on irritated skin and massage deeply 2-3 times a day to soothe itching, burning or rashes.
- Shake and spray on dry itchy scalp and massage deeply 2-3 times a week.

- Shake and spray on callous feet, cracked heels or chapped lips and massage deeply twice a day.
- To prevent the formation of stretch marks and increase skin's elasticity during pregnancy massage Argan Oil deeply twice a day into stretch marks prone areas such as: hips, thighs, breasts and stomach.

HOW TO USE ARGAN OIL FOR FACE

- Shake and spray evenly at a distance of approx. 25 cm. on your face, closing your eyes (you can also spray it into the palm of the hand), then gently massage your face in the morning. Apply only the amount your skin can absorb to avoid undesired shine. This varies from one person to another depending on skin type and condition; adjust gradually the amount as needed.
Focus on wrinkle prone areas in the evening before going to bed for a glowing skin the next morning.

HOW TO USE ARGAN OIL FOR HAIR

- Before styling, shake and spray lightly at a distance of approx. 25 cm. to wet hair to protect from styling tools' heat. Rub gently from ends to roots. Go very light on the roots. Argan Oil will protect and nourish your hair without stiffness or stickiness. It will tame frizz, add shine and enhance your natural curls. The ideal amount of Argan Oil for styling depends on your hair length, thickness and condition. Adjust gradually the amount as needed.
- To repair damaged broken hair, massage a generous amount deeply into your hair strands from roots to ends and leave overnight. If you have thick hair, section your hair into small sections and massage Argan Oil deeply into each section separately. If you prefer to use Argan Oil as a Hot-Oil-Treatment simply cover your hair with a towel or with a plastic cap and sit in Sauna or under a hooded dryer for 15-30 minutes.
- To stimulate hair growth use your fingertips to massage a generous amount deeply into your scalp 2-3 times a week.

HOW TO USE ARGAN OIL FOR NAILS

- Sink nails in water sprayed with Argan Oil and with freshly squeezed lemon juice for 15 minutes once a week.

STORAGE

Store in a cool dark area, away from direct heat and light.

IGEPAK S.A. offers turnkey tailor-made solutions from developing, producing and filling aerosols to delivering anywhere in the world. It also provides support regarding existing regulations The Company's facilities include: White room, water treatment plant (osmosis and CDI), seven fully automatic filling lines. Three of these lines are prepared for filling with the B.O.V. system.
