

VOLUMIZING AND DENSIFYING HAIR MOUSSE

IGEPAK S.A., contract filler and a company with a wide expertise in the development and production of aerosol products, has developed a **VOLUMIZING AND DENSIFYING HAIR MOUSSE** that provides density and volume to fine hair without weighing it down or leaving it crunchy. Hair is left visibly thickened and noticeably softer. Light texture. No residue. It contains a UV filter that protects the hair from external aggressions and prevents your hair color from fading too soon.

FOR A NATURAL RESULT AND PERFECT FINISH

It provides maximum body and fullness to fine hair while reducing frizz and keeping curls under control. It restores elasticity for springy curls that bounce back. Perfect for enhancing the curl definition without stiffness or stickiness.

It is very easy to apply.

HOW TO USE THE VOLUMIZING AND DENSIFYING HAIR MOUSSE

Shake well before use and hold the can upside down. Dispense a tennis ball-size amount into palm of hand. Spread evenly through washed and towel-dried hair.

Apply the hair mousse strand by strand, focusing on the roots for maximum volume.

Do not rinse. Style as usual.

IGEPAK S.A. offers turnkey tailor-made solutions from developing, producing and filling aerosols to delivering anywhere in the world. It also provides support regarding existing regulations The Company's facilities include: White room, water treatment plant (osmosis and CDI), seven fully automatic filling lines. Three of these lines are prepared for filling with the B.O.V. system.
