

SHAVING FOAM AEROSOL

IGEPAK S.A., a contract filler and company with a wide expertise in the development and production of aerosol products, has developed a shaving foam in aerosol form, that ensures a close and comfortable shaving even for sensitive skin.

FAST AND EASY TO USE

The shaving foam in aerosol is very convenient: it is fast and easy to use. The creamy texture minimizes friction and improves razor glide during shaving. It also allows an optimal and very hygienic preservation of the product.

A SMOOTH SHAVE FOR SENSITIVE SKIN

It contains **Allantoin and Glycerin** to hydrate, nourish and revitalize the skin and **Aloe Vera**, which soothes and regenerates the skin after shaving. This creamy shaving foam favors the sliding of the blade, protecting the skin from small cuts. Its components avoid irritations.

As a result, the skin looks healthy and feels comfortable and smooth.

DIRECTIONS

Shake the can before use. Keeping it in vertical position, dispense the desired quantity of foam. Spread it over the face, previously dampened with lukewarm water, and form a thick, creamy lather with the fingertips. Shave and then rinse.

IGEPAK S.A. offers turnkey tailor-made solutions from developing, producing and filling aerosols to delivering anywhere in the world. It also provides support regarding existing regulations. The Company's facilities include: White room, water treatment plant (osmosis and CDI), seven fully automatic filling lines. Three of these lines are prepared for filling with the B.O.V. system.
