

## 360° MOISTURIZING BODY LOTION

**IGEPAK S.A.**, a contract filler with wide experience in the development and production of aerosol products, has developed the 360° MOISTURIZING BODY LOTION which is of light consistency and provides intensive moisturizing care with rapid absorption and no sticky feeling. The lotion is filled with the bag on valve system, so that the product is not in contact with the propellant and it can be sprayed on at any angle.

## A QUICK AND EASY WAY TO MOISTURIZE

This instant moisturizing body lotion has a fluid, delicate texture that takes just seconds to apply and is absorbed instantly. You can get dressed immediately. It is very easy to apply at any angle in a thin layer that hydrates deeply and absorbs in seconds. It keeps the skin moist all day long without the skin getting sticky. Its formula contains glycerine, avocado oil and vitamin E for deep moisture and antioxidant protection. It reconditions the skin even when the product is rinsed off.

The skin is moisturized and noticeably softer and smoother from the first application. The formula can be scented with a fragrance for a perfumed and refreshed skin.

## INSTRUCTIONS FOR USE

Apply at a distance of 2-4 inches from your body skin and quickly massage it in. You can get dressed immediately. Do not spray on your face. For best results, apply daily. Then rinse your hands with clean water.

**IGEPAK S.A.** offers turnkey tailor-made solutions from developing, producing and filling aerosols to delivering anywhere in the world. It also provides support regarding existing regulations. The Company's facilities include: White room, water treatment plant (osmosis and CDI), seven fully automatic filling lines. Three of these lines are prepared for filling with the B.O.V. system.
