

HYDROALCOHOLIC HAND CLEANSER AND HYGIENE FOAM

IGEPAK S.A.U., a contract filler with ample experience in the development and production of aerosol products, has developed a new HYDROALCOHOLIC HAND CLEANSER AND HYGIENE FOAM which cleans the hands without the need to rinse with water. and provides a soft touch. With a light texture, this alcohol-based formula is quickly absorbed so as not to leave the hands greasy. This product is mainly for cosmetic use. It provides a pleasant cleanliness and sensation of freshness.

IT CLEANS THE HANDS WITHOUT THE NEED FOR WATER

This ultra-lightweight foam cleans and takes care of the hands. No water or rinsing is needed. The formula for the aerosol contains 60% ethanol by mass (65% by volume). It penetrates quickly, leaving the skin soft and well cared for thanks to the dermoprotective, softening and moisturizing properties of glycerine and aloe vera, which give the hands a feeling of cleanliness and freshness but do not dry the skin. Ideal for taking away or leaving in the car for use anywhere and at anytime.

DIRECTIONS:

Shake well before use. Hold the can upright, squeeze a small amount of foam onto your hand. Massage the foam into the skin and let it absorb. Do not rinse. For frequent use. Only suitable for healthy skin, without cuts or wounds.

IGEPAK S.A.U. offers turnkey tailor-made solutions from developing, producing and filling aerosols to delivery anywhere in the world. It also provides support regarding existing regulations. The Company's facilities include: a white room, a water treatment plant (osmosis and CDI) and seven fully automatic filling lines. Three of these lines are prepared for filling with the B.O.V. system.
